PROFILE

Detail-oriented GSOC Operator with 10+ years of experience in 24/7 operations, incident response, and integrated physical and cybersecurity risk management. Proven leadership in safety operations, including deploying digital alert systems and presenting safety metrics to executive leadership. Strong background in safety systems (ISO 45001/OHSAS 18001), hazard analysis, and data-driven decision-making, supporting multi-site operations with 2,000+ employees. Experienced in SIEM tools (Splunk), help desk support, and cross-functional communication, with a focus on risk mitigation, incident monitoring, and operational efficiency. Brings strong crisis management and rapid decision-making to enhance threat detection, response, and protection of people and assets in high-pressure environments

WORK EXPERIENCE

Occupational Health and Safety Leader **Loga Waste Management**

 01/2016 – 01/2018  SÃO PAULO, BRAZIL

- Led EHS 24/7/365 operations, integrating technology to optimize waste logistics across multiple sites in São Paulo, enhancing operational efficiency and safety monitoring.
- Utilized advanced data analytics and software tools to generate and present detailed performance and safety metrics to senior leadership, supporting informed decision-making.
- Coordinated digital safety initiatives, including the deployment of alert and monitoring systems, to manage hazardous work environments and infrastructure projects effectively.
- Ensured strict regulatory compliance and upheld safety standards through implementation of advanced IT systems and processes, contributing to risk mitigation and incident prevention.
- Collaborated with cross-functional teams to communicate safety information clearly and promptly, supporting rapid response and crisis management efforts.
- Monitored and supported operations of a large-scale automated waste sorting system (German-engineered), responsible for mechanical separation of recyclable materials (plastic, aluminum, glass, and paper), including shredding and material distribution for recycling purposes.
- Acted as primary support contact (helpdesk) for safety technicians across multiple sites, troubleshooting operational issues, providing guidance on procedures, incident response, and risk analysis.

Occupational Safety and Quality Specialist **Sodexo Food Service & Facilities**

 01/2015 – 01/2016  SAO PAULO/CURITIBA, BRAZIL

- Led EHS management for 2,000+ employees, implementing a cybersecurity-driven safety management system with key performance indicators to enhance operational safety and data protection.
- Directed digital inspections and risk assessments for heat equipment and chemical management, utilizing advanced technologies to safeguard sensitive information and ensure regulatory compliance.
- Monitored safety data and generated regular reports to inform leadership and support continuous improvement in safety practices.
- Collaborated with cross-functional teams to integrate security principles into safety protocols, strengthening overall risk mitigation efforts.
- Conducted on-site hazard and risk assessments for large-scale clients, including Faber-Castell (consumer goods), Embraer (aerospace/defense), Bosch (manufacturing/engineering), Natura (cosmetics)

Occupational Health and Safety Technician **Estre Environment**

 01/2013 – 01/2015

- Performed daily environmental, health, and safety inspections across 300+ sites, hundreds of trucks, and heavy equipment using digital tools, ensuring thorough monitoring of operational risks and safety compliance.
- Managed maintenance shop operations and conducted fuel station checks through automated systems to

WORK EXPERIENCE

- enhance operational efficiency and safety standards.
- Provided technology-driven support to Operational Base Safety Engineers and corporate teams, assisting safety management across more than ten sites with data-driven solutions and safety reporting.

Academic Excellence Award (GPA 3.8+) – Awarded to full-time students (12+ credits) (Award for the First Time)
- 📅 08/2021

Returned Missionary Scholarship
Ensign College

Scholarship awarded to students who successfully completed a recognized volunteer service mission.

VOLUNTEERING & LEADERSHIP

Block Captain
Orem City/Orem Fire Department
📅 09/2019 – 04/2023 📍 OREM, UT

- Led community emergency preparedness by conducting door-to-door assessments during drills to identify residents’ safety needs including mobility limitations, elderly care, oxygen use, and basement occupancy.
- Reported detailed emergency data to central coordination to enhance local response planning and resource allocation.
- Participated annually in emergency preparedness trainings, honing skills in security monitoring, clear communication, and prompt incident reporting.

VOLUNTEERING & LEADERSHIP

Volunter

St. Vincent de Paul Dining Hall

📅 01/2024 – 09/2024 📍 SALT LAKE CITY - UT, USA

- Supported end-to-end dining hall operations, including food preparation, service, and cleanup.
- Assisted in meal preparation and distribution, serving community members efficiently.
- Ensured compliance with hygiene and sanitation standards in kitchen and dining areas.
- Managed food handling tasks, including inventory movement, preparation, and organization
- Maintained a clean and safe environment through dishwashing, waste management, and facility upkeep.

PROJECTS

Project Leader

Hazard & Risk Analysis Project - TWM Operations

📅 01/2017 – 05/2017 📍 SAO PAULO, BRAZIL

- Led a team of 8 safety technicians to conduct on-site risk assessments across 20,000 + streets in Total Waste Management Operations in São Paulo
- Developed and managed a centralized Excel database to classify risks (low to critical) based on operational, environmental, and safety factors
- Coordinated data collection, analysis, and cross-departmental reporting (Operations, Logistics, Maintenance, Corporate)
- Presented findings and recommendations to corporate leadership using data visualization and field evidence
- Contributed to reduced incidents, improved workforce allocation, and safer operational planning

Skills: Leadership, Communication, Team Management, Data Analysis (Excel), Risk Assessment, Presentations

Key Challenges: Managing large-scale data collection and analysis. Translating technical risk data into clear, Actionable insights. Delivering results under tight deadlines

Safety and IT Support

IT & Safety Systems Implementation

📅 04/2015 – 05/2015 📍 CURITIBA, BRAZIL

- Led implementation of IT infrastructure and safety systems for a large hospital food and facilities service operation
- Installed and configured Wi-Fi networks, computers, operational systems, printers, and payment systems
- Set up digital order management displays for patient meal services
- Implemented safety procedures, equipment setup, signage, and compliance standards
- Delivered employee training and supported initial operations alongside management and leadership

Skills: IT Systems Implementation, Networking Basics, Operations Support, Safety Compliance, Training & Onboarding

Challenges: Full system setup from scratch. Operational readiness under time constraints. Cross-Functional coordination
